Package Contents

- One (1) Page/Talk Outdoor Enclosure
- One (1) Installation & Operation Manual

Options

- VR-WTE Vandal Resistant Screws With Driver Bit For Escutcheon Plate
- LCK-WTE Locking Door

Overview

Page/Talk Outdoor Housings

Guardian's Page/Talk Systems provide reliable and easy to use paging and communication within industrial environments such as plants, mills and factories. Individuals can be paged from any station and two or more persons can communicate on any available line.

The Outdoor Housings described in this manual are designed for use in harsh, industrial environments. Housings intended for handset or amplifier stations are identical and can be used for single talk line or five talk line configurations.

Features

Enclosure

- Thermoplastic resin body construction
- weatherproof and corrosion resistant

Cable Entrances

- drill and tap to suit

Connectors

- removable screw and plug Combicon connectors allow for ease of installation, simply screw wires into plug and reinsert plug into PCB socket

Crossbar

- Removable for ease of access

Page/Talk Outdoor Housings Models

| Part No. | Description |
|-----------------|---|
| P5524 | Single line with ambient noise sensing microphone |
| P5525 | Single line |
| P5526 | Five line with ambient noise sensing microphone |
| P5527 | Five line |

Note: Single line housings can be converted to five line by simply removing a jumper and five line housings can be converted to single line by installing a jumper - P/N P005468/01.

| Spare Conductor (Special Order) | n/a | Extra | Red | | 12 AWG |

Note:

Channels 2 to 5 connections remain empty for single Talk Line hookup.

If this station is in a Group Muting series, but is not to be muted when paging calls are made from other stations in the group, connect the wires assigned to this function to the Park terminals.

Figure 7 - Electrical Connections

Installing the Outdoor Housing

WARNING - high voltages are present in this equipment when it is connected to the power source.

- Follow all appropriate electrical codes and use only approved electrical fittings for the installation.
- For cable entrances drill and tap to suit in the recesses on top, bottom or lower portion of sides.
- Install suitable fittings in the cable entrances.
- Choose a wall location that is free of obstructions and permits space for conduit or wire.
- Ensure mounting can support 20 lbs. / 9 kg (with module installed), and any additional foreseeable load.
- Remove the crossbar.
- Use the template provided or the housing itself to locate and drill holes for mounting screws and secure the unit to the wall.
- Ensure that none of the electrical connection circuits are live.
- Bring cable(s) into the enclosure through the conduit entrance(s) and attach individual wires to the Combicon connector(s). Attach the wires from the first or only cable to the bottom connector. Make Talk channel connections to terminals 1A and 1B for a single line station.
- Plug the connector(s) into the receptacle(s) on the interface board.
- If the station is part of a Group Muting series connect the wires assigned to this function to either the Mute or Park terminal on the connector.
- Connect loudspeaker wiring if provided.
- Install the crossbar.
- Ensure that all connections are secure.

See: Figure 2 - Dimensions

See: Figure 6 - Wiring and Figure 7 - Electrical Connections

*See: Group Muting
See: Module manual for suggested speaker configurations.
See: Figure 5 - Crossbar Assembly Photo*

| Wire Gauge | Area (mm ²) | 4 Ohm Load | 8 Ohm Load | 16 Ohm Load |
|------------|-------------------------|----------------|----------------|-----------------|
| 18 AWG | 1.2 | 40 ft. (12 m) | 80 ft. (25m) | 160 ft. (50 m) |
| 16 AWG | 1.5 | 60 ft. (18 m) | 120 ft. (36 m) | 240 ft. (72 m) |
| 14 AWG | 1.8 | 100 ft. (30 m) | 200 ft. (60 m) | 400 ft. (120 m) |

Note: Performance may vary depending on a number of factors such as the type and thickness of insulation on the conductors and whether or not twisted pairs are used.

Warranty

Guardian Telecom warrants your product to be free of defects in material and workmanship for a period of three years. Guardian Telecom will repair or replace any defective unit that is under warranty free of charge.

This warranty is null and void if any non-authorized modifications have been made to this product, or if it has been subjected to misuse, neglect, or accident. This warranty covers bench repairs only; such repairs must be made at Guardian Telecom or an authorized service depot. Guardian Telecom is not responsible for costs incurred for on-site service calls, freight, or brokerage.

A return authorization must be obtained prior to warranty claims or repairs.

Disclaimer

The products covered by this manual are designed for use in Industrial Environments and/or Hazardous Locations. Due to the range of possible applications for these instruments the manufacturer will not be responsible for damages or losses of any kind suffered as a result of the use of this product, including consequential damages.

Warning

High voltages may be present in this product, ensure that power is removed before installing, performing maintenance or making repairs.

Service Telephone Number

1-800-363-8010 Toll Free in North America

Guardian Telecom provides a customer service telephone number which is toll-free within North America. If you need assistance when installing or operating this product, please call the toll-free telephone number between regular business hours (7:30AM-5:00PM), Mountain Standard Time. If you are calling outside of regular business hours, please leave a detailed message and a member of Guardian Telecom's Service Department will return your call as soon as possible. If your product requires service, Guardian personnel will supply you with an RMA (return materials authorization) number over the telephone or through our web site product return page. This number must be included with your return address and the name of the person to contact.

Guardian Telecom, A Division of Circa Enterprises Inc.

Feedback

Guardian Telecom continually strives to make reliable, durable, and easy to use products. If you, as an installer or user of our equipment, have any suggestions for improvements to this or any of our products or documents, including this manual, we would appreciate hearing from you.

| Guardian Product Return |
|---|
| Guardian products have been quality tested and are in full working order when shipped from the factory, given the rugged nature of these products shipping is not expected to damage a unit. In the unlikely event of a malfunction Guardian follows the three step procedure below. |
| <i>Step I - On-Site Correction</i> |
| <ul style="list-style-type: none"> • The most common source of difficulties with a new product is improper installation in one of two ways: incorrect wiring connections or connection to an incorrect power source. • Product wiring needs to be properly connected to the on-site wiring. Correct wiring instructions are shown in the user manual included with the product. |
| <i>Step II - Return Materials Authorization (RMA)</i> |
| <ul style="list-style-type: none"> • When a product has been installed following user manual instructions and the unit fails to operate, the user must contact Guardian Telecom to obtain authorization to return the product. This can be done by completing an RMA form online at https://www.guardiantelecom.com/support/rma/, or by calling the service telephone number given in this manual. • After providing information on the product, the owner and the nature of the problem, Guardian will issue a RMA number, to be shown on documentation returned with the product. • In addition to the RMA number, shipping documents should include name, address and telephone number of the owner along with contact information for the person responsible for the repair and/or the user who identified the malfunction. • (Where a product is being returned for repair from outside of Canada, customs documentation must show the product's serial number, date of export [date of purchase], and a notation that the equipment is: "Canadian goods returning.") |
| <i>Step III - Factory Authorized Service</i> |
| <ul style="list-style-type: none"> • Once received, each product is carefully inspected and tested. If the product is under warranty, repairs are completed and the product returned to the owner, generally within five working days of receipt by the factory. • A product that has been subjected to misuse, neglect or accident or is beyond the warranty period will be evaluated. The service department will provide the owner's representative with a repair cost estimate. Once approved, repairs are completed and the product returned, generally within five working days. |

Cleaning Tips for Guardian Telephones

Guardian Telephones may occasionally need to be cleaned to maintain appearance. Generally, wiping the surface with a clean, water dampened cloth will remove most films or residues. If the soiling is too stubborn for plain water, a mild detergent solution may be used. Be sure to wipe away any detergent residue with a plain water dampened cloth. The Telephone may be cleaned with any general-purpose household glass and surface type cleaner. Do not spray the telephone directly! Spray the cleaner on a soft cloth then wipe the surface. Pre-treated cloths such as those used for eyeglasses or cameras may be used to clean the Telephone. Premoistened towelettes may also be used, however, avoid those containing lanolin or aloe as they will leave a slippery residue. The handset and surface of the telephone may be cleaned with disinfectants used for general cleaning in a medical environment. Isopropyl alcohol may be used applied with a cloth. Avoid using alcohol on silicon based keypads, since doing so may significantly degrade legibility.

- Do not use furniture polishes, waxes or plasticizer-based cleaner (Armor All etc.)
- Do not use lanolin, aloe, glycerin or other skin care type products.
- Do not apply any solvent such as acetone, mineral spirits etc.
- Do not directly spray or immerse the handset.

Storage

General Storage (All situations):

- Note any stacking limits or warnings on packaging (if any).
- Do not store in temperatures over +80C.
- Store in original packaging if possible until needed.

Long Term Storage (> 6 Months):

- If area is air conditioned and not subject to high changes in humidity, continue to store in original packaging.
- If wide humidity shifts are expected, then use these steps:
 - Remove product from packaging (including plastic bags) and store on shelf in open air.
 - If area is subject to a high degree of dust, to help maintain cosmetic appearance you can cover with cloth (Do not cover with plastic or materials that will trap moisture) or clean periodically.
 - Do not store out of packaging long term where they are exposed to sunlight. Long term exposure to UV may cause fading on plastic parts.
