  - Guardian's input allow for integration with intrusion sensors
- Cloud based platform (always current)
- Unlimited users
- Gateway (included)
- Security - 256-bit advanced encryption standard (AES) encryption
- Uptime 99.999%
- Event Tracking
- Notifications and Integration with Video Systems
  - Guardian devices can send photos directly to email and/or text in real time when a button is pressed
- Registration Status
- Deployed Guardian devices:
  - Monitor
  - Configure
  - Maintain
- iGuard supports all of Guardian's VoIP telecommunication devices.

### iGUARD MONITORING SOFTWARE

iGuard is an encrypted, cloud-based platform that allows you to configure, monitor and maintain deployed Guardian endpoints. iGuard Reports on all your Guardian endpoints are easily exported into CSV or Excel formats for you to review/store and third-party integration to CCTV systems, etc. allows for insight into any usage of the devices which can help should there be a need to have an image on file as well.

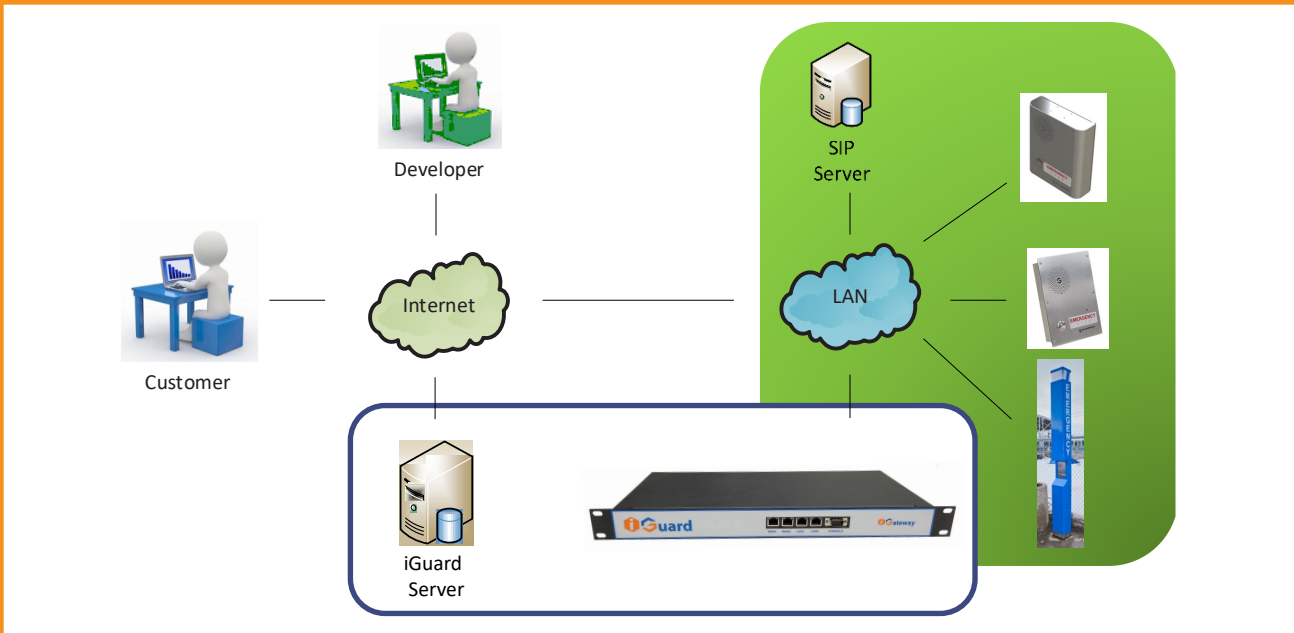

### APPLICATIONS

iGuard will monitor Guardian devices designed to provide reliable communications in outdoor environments subject to vandalism, moisture, dust and corrosive chemicals such as:

- |                        |                        |                     |
|------------------------|------------------------|---------------------|
| Universities           | Public Access Areas    | ATMs                |
| Secure Access Entry    | Transit Authorities    | Medical Centers     |
| Public Safety Purposes | Senior Citizen Housing | Sporting Facilities |
| Industrial Parks       | Building Entrances     | Elevators           |
| Parking Facilities     | Plant Entry Gates      | Muster Points       |
| Transit Authorities    | Amusement Parks        | Sporting Facilities |
| Medical Centers        | Senior Citizen Housing | Airports            |
| Mass Transit           | Road Networks          | Parks               |
| and more ...           |                        |                     |
