GUARDIAN TELECOM PUBLIC SAFETY TELECOMMUNICATIONS

PUBLIC SAFETY MATTERS

Guardian Telecom's Public Safety Telecommunication Solutions and Equipment are at the forefront of helping people feel confident, comfortable, and empowered about their safety when they move around public and private areas like transit systems, bridges, tunnels, parking lots, educational campuses, industrial complexes, business parks, roadways, parks and recreational areas, and city streets.

Public Safety Telecommunication Equipment like blue light emergency phone towers / wall mounts, help buttons, intercoms and telephones are ideal for use at college campuses, hospital parking lots, shopping malls, medical centers, industrial facilities, transit stations, and other high risk remote public areas where security is a concern. They work as an affordable crime deterrent and by having these highly visible and easily accessible devices placed in the community, the public is continually reassured that they can summon emergency assistance immediately. We offer public safety organizations perfectly tailored telecommunications solutions for the entire public safety market. Guardian Telecom stands behind its products with the industry's best warranty and support.

Our products are designed for absolute reliability for maximum uptime. Because when it comes down to it, every second counts.

WHERE GUARDIAN TELECOM IS AT WORK

EDUCATION / UNIVERSITIES PUBLIC SAFETY

Student safety is of the utmost importance. Guardian Telecom Help Point Pedestals are highly visible and allow for students, faculty and visitors to feel at ease while walking the campus.

MASS TRANSIT & TRANSPORTATION PUBLIC SAFETY

Making transit safe and effective for all is a complicated task. Wherever the public go, they should be able to call for assistance 24x7, 365 days a year, and Guardian Telecom Help Points do just that. Connect the public with security personnel when needed.

HEALTHCARE

At hospitals and other healthcare facilities Guardian Telecom Help Points connect the public quickly and easily to facility staff and help get answers.

CORPORATE / BUSINESS PUBLIC SAFETY

Your facility or business campus requires a trusted connection to staff or security should visitors require assistance in finding their destination or if an emergency situation arises.

GOVERNMENT / MUNICIPALITIES PUBLIC SAFETY

Guardian Telecom Help Points can be used as muster points and / or provide access control along with increased security for your facility, all while making it easy for the user to communicate with site staff.

PARKS / PARKING / STADIUMS / PUBLIC AREAS

Being safe and secure in open public areas is important. Guardian Telecom emergency phones help to improve safety and perceived safety in these areas by acting as a crime deterrent and by offering a quick notification and response in an emergency situation.

PUBLIC SAFETY PRODUCT LINE

RUGGED, SAFE, RELIABLE AND COST-EFFECTIVE PUBLIC SAFETY TELECOMMUNICATION SOLUTIONS

Harsh environments, extreme elements, critical infrastructure, and safety-critical and mission-critical applications call for rugged and reliable solutions. Guardian Telecom is known worldwide as provider of the most reliable, ruggedized telecommunications equipment, supported with advanced technical expertise and exceptional customer service for our customers. We've brought all of that experience and more to our Public Safety Product Line. Experience Counts. Robust designs, manufactured and tested in a controlled setting ensure Guardian Telecom products consistently meet and exceed our customers' expectations. All backed by our industry leading 5 year warranty.

OGP RANGE - EMERGENCY / ASSISTANCE HELP POINT TOWERS AND WALLMOUNTS

Guardian's OGP (On-Guard Protector) RANGE of Heavy Duty Emergency Industrial Help Point Telecommunication Devices and Towers, combined with Guardian's HDE Series of Analog and VoIP Help Point hands-free devices are intended for use in public areas where direct / emergency assistance or hands-free communication is required. Guardian Telecom is offering you a new standard in help point design, reliability, safety, quality and value.

HDE RANGE - HEAVY DUTY EMERGENCY / ASSISTANCE INDUSTRIAL TELEPHONES

Guardian's HD RANGE Heavy Duty Emergency Industrial Telephones the Guardian HDE SERIES (Analog) and HDE-V SERIES (VoIP) telephones provide a two-way link to emergency, access or information assistance through full-duplex phone transmission. A call may be initiated from the phone by pushing the button which routes the call to its assigned extension. These phones also provide the capability of monitoring the status of each unit from a remote location, informing personnel of a malfunction.

AC RANGE – VANDAL RESISTANT HEAVY DUTY CAST ALUMINUM TELEPHONES

Guardian's AC RANGE meets the demanding requirements of sites that are prone to abuse and inclement weather. Rated for Moderately Harmful and Adverse Areas.

Guardian's ACT / ACR Series of Cast Aluminum Telephones are housed in a locking or non-locking aluminum enclosure. These telephones resist moisture, dust and corrosive chemicals. They are specially designed to provide reliable service in outdoor environments.

WR RANGE / WT RANGE - RUGGED & RELIABLE EMERGENCY / ASSISTANCE WATER RESISTANT & WATER TIGHT TELEPHONES

Guardian's WR RANGE Weather Resistant and WT RANGE Heavy Duty Water Tight Industrial Telephone Series are designed for rough-service areas, special communication needs, and ensure high quality communications under extreme working conditions. The new Guardian Telecom's WRT-HDE-V & WRR-WDE-V combination Handset/Hands-free Emergency Telephone is designed for easy and flexible communications between public users and emergency operators - the stations feature both handset and hands-free mode with a built in programmable auto-dialer.

IGUARD MONITORING SOFTWARE

iGuard is an encrypted, cloud-based platform that allows you to configure, monitor and maintain deployed Guardian endpoints. iGuard Reports on all your Guardian endpoints are easily exported into CSV or Excel formats for you to review/store and third-party integration to CCTV systems, etc. allows for insight into any usage of the devices which can help should there be a need to have an image on file as well.

SC RANGE & CI RANGE - STEEL COMPACT AND CORRECTIONAL INSTITUTE TELEPHONES

Guardians SC RANGE are engineered to deliver reliable, high quality communications where standard telephones are not suitable, ensuring high quality communications under extreme working conditions.

Guardian's CI RANGE are rugged telephones designed to provide safe, reliable communication in Correctional locations prone to abuse and vandalism. The rugged nature of these telephones reduces overall costs as they are not constantly being repaired or replaced in hostile environments.

CUSTOM DESIGNED AND ENGINEERED EMERGENCY / ASSISTANCE HELP POINT PRODUCTS

Need something different? Does your architectural and design creative vision require the highest standard of fabrication for a compatible modern designed emergency / assistance help point telephone? Guardian Telecom will bring your architectural and design vision from sketch to reality. At Guardian, "Custom Design" is a pair of words with many meanings, from the modification of existing products to the use of color, graphics, features, parts or labeling right up to the development of new designed products.

THE GUARDIAN ADVANTAGE

INDUSTRY LEADING 5 YEAR WARRANTY

All our Public Safety Telecommunication Equipment comes with our Industry Leading 5 Year Warranty. As a reflection of our unwavering commitment to quality, Guardian Telecom offers our industry leading 5 Year Warranty that can be extended to 10 years, so you have complete peace of mind.

SECURITY

The focus on safety and security has never been greater than it is today. If safety is your priority, you need the confidence that your help points are going to work, when you need them to – in times of emergency or assistance, 24/7. Our products are designed for absolute reliability for maximum uptime, ensuring optimal performance.

RUGGED SUPERIORITY

Just making a low-cost telecom device to operational minimum industry standards is not good enough. Guardian Telecom products are designed and engineered from the ground up to work in the harshest of public environments. Engineering and manufacturing of a secure area telecommunication device is never compromised at Guardian Telecom.

BETTER VALUE - BETTER ROI

Because our products are built to last, require less repairs, are easily installed, have innovative features and will keep working in the most difficult conditions, you will see a better return on your investment. No costly repairs, no expensive downtime, no replacing broken telecom equipment; the result, your net operating costs will go down.

QUALITY

In today's marketplace, some say quality is a given. At Guardian Telecom, quality is a passion. We embrace the ISO Quality Management Standard and are ISO 9001:2015 registered.

RELIABILITY

We know when you experience telecom equipment downtime, the results can be staggering. Implementing solutions that enable you to improve reliability and security of your operational equipment is a bottom-line issue for us. Our products are designed for absolute reliability for maximum uptime.

EXPANDABILITY

Guardian Telecom has built a reputation for our willingness to customize products to make them work the way our customers want and need them to operate. From camera mounts, enhanced lighting, wireless access points, and solar panels to the use of color, graphics and labeling.

EXPERIENCE

Guardian Telecom has years of experience manufacturing thousands of rugged telecommunications devices for clients in virtually every industry. Our customers expect responsive and immediate service, expert recommendations, cost competitive solutions and a company that stands by its word and does what it says. Guardian Telecom does all that and more. Our employees and customers do not expect anything less.

MADE IN NORTH AMERICA

Founded in Canada over 30 years ago, our products have been proven, tested, and trusted in the most strenuous environments around the world. Our help point devices and mounts are all manufactured in-house in Canada all based out of our headquarters in Calgary, AB, Canada.

GUARDIAN TELECOM AND PUBLIC SAFETY TELECOMMUNICATIONS SOLUTIONS

Guardian Telecom knows that the final criteria in selecting a public safety communications device, or range of solutions, must be the customer's long-term benefit. This has been the foundation for the development of every one of our rugged telecommunication devices. Our history and growth have been supported by our customers asking us to 'do more' and we have. We have made significant investments in R&D, technology and people to meet and exceed customer requirements.

This is especially true in our development of public safety telecommunication devices and solutions.

When we designed our emergency and assistance phone help point series, it was based on client requests to design a rugged and reliable telecommunications device to fit into help point phones installed by other manufacturers that were having issues with reliability. Often the help point phones were out of service. We started replacing these unreliable phones with great success.

We also decided to design reliable and rugged help point systems, from pedestals to wall mounted units that avoided the failure points of systems already on the market. We had to go beyond the industry standard to meet those challenges; like, rugged reliable components, condensation and corrosion resistance, easy access panels, and easy low-cost installation.

We future proofed for features like: wireless access points, media converters, power supplies, paging speakers, and other emerging technologies.

Guardian Telecom products are engineered from the ground up to work reliably, provide excellent value and last – especially in the roughest weather, toughest applications and most extreme environments.

Simply put, Guardian Telecom products are built rugged, tough, and dependable to last in the harshest environmental conditions in the world. That includes any and all areas in need of public safety telecommunications.

Guardian Telecom is offering you a new standard in help point design, reliability, safety, quality and value.

tough. trusted. true.

Guardian Telecom is known as a world leader of building rugged, safe, reliable telecommunication devices used in harsh environments, extreme elements, critical infrastructure, and safety-critical and mission-critical applications.

Residing in power plants in the hot desert sun to production platforms battling arctic temperatures, and high vibrations within manufacturing plants, or extreme environmental conditions in nuclear facilities, thermal and hydro plants, and into mining excavations. Our equipment and systems are manufactured for transportation facilities, tunnels, highways, rail systems and airports. Our products are placed in pharmaceutical plants, grain, and food processing plants.

Guardian Telecom's safety and rugged equipment is distributed throughout various state and federal institutions including college and university campuses worldwide.

Our products are utilized in the travel and entertainment industry such as hotels, resorts, theme parks, baseball and football stadiums, golf courses, the movie and production industry, entertainment arenas, and on travel cruise liners. Outdoor gateway entrances, border crossings or high-end security gated facilities, and fenced-in areas.

Top military units such as the Marines, Navy, Army, and intelligence agencies acquire our ruggedized equipment to be used in ships, buildings, tankers and war zones. Ranging from NASA to Space X using Guardian Telecom's equipment throughout its testing and launch facilities to corporate and commercial day-to-day work environments.

Experience Counts - You can trust Guardian Telecom
