

## iGUARD MONITORING SOFTWARE

iGuard is an encrypted, cloud-based platform that allows you to configure, monitor and maintain deployed Guardian endpoints. iGuard Reports on all your Guardian endpoints are easily exported into CSV or Excel formats for you to review/store and third-party integration to CCTV systems, etc. allows for insight into any usage of the devices which can help should there be a need to have an image on file as well.

# iGuard

## Help Point Monitoring

### IIoT Cloud Based Monitoring Platform

- iGuard Remote Cloud Based Monitoring
- On-Prem Version Coming Soon

### FEATURES and BENEFITS

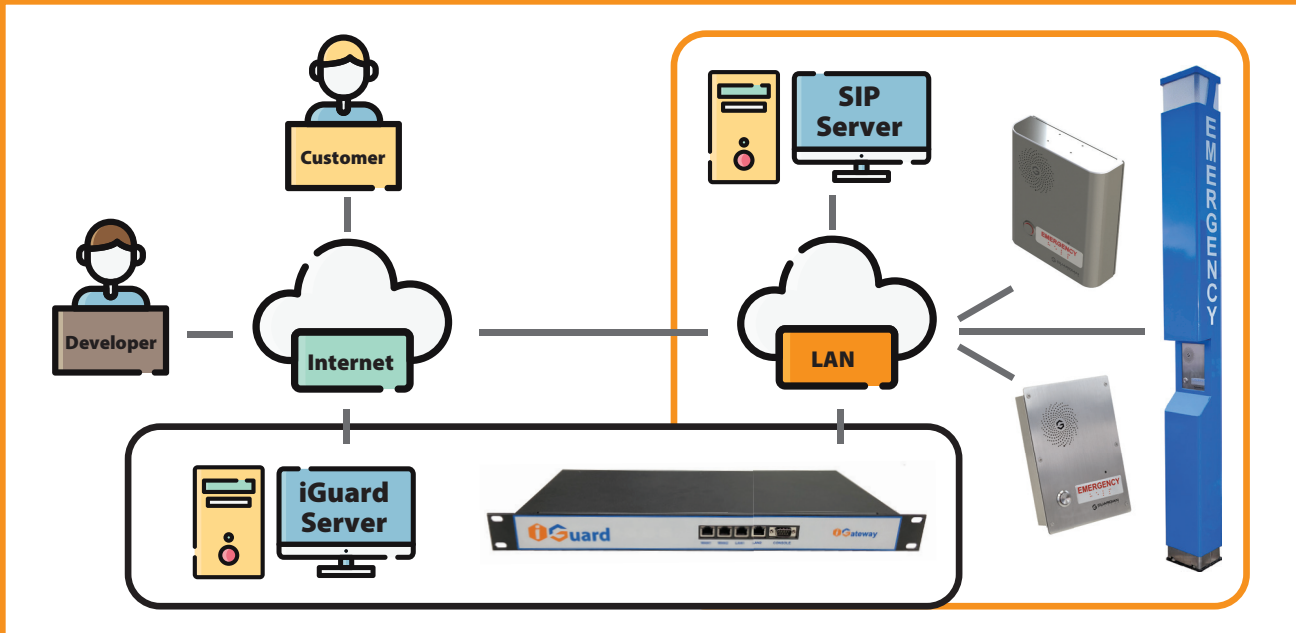

- Real time Guardian SIP device monitoring (SNMP V2 capable)
- Event / Alarming trending
